Vol. 2, Nos. 1–6 January–November 1961 Pages 1–1660

ANNUAL INDEX OF AUTHORS

Ahiezer, N. I. *A continuous analogue of orthogonal polynomials* 1409
Analogue of polynomials orthogonal on arc 1526
Ahiezer, N. I.; and Tomčuk, Yu. Ya. *On the theory of orthogonal polynomials over several intervals* 687
Aĭzenberg, L. A. *The spaces of functions analytic in (p, q)-circular regions* 79
Integral representations for functions holomorphic 497
Akim, È. L.; and Levin, A. A. *A generating function for the Clebsch-Gordan coefficients* 629
Akivis, M. A. *On n-dimensional surfaces bearing a net of conjugate lines* 1065
Alekseev, A. D. *A singular integral equation on the contour of class R* 83
Alenicyn, Yu. E. *Domains of variation of functions representable as Stieltjes integrals* 892
Al′per, S. Ya *Approximation of analytic functions in the mean* 36
Andô, Tsuyoshi *Certain classes of convex functions* 139
Andrianov, A. N. *Theorem of M. Eichler from quaternary quadratic forms* 1363
Arešķin, G. Ya. *Cauchy directions and extensions of regular spaces* 211
Arhangel′skĭ, A. *Paracompactness and metrizability of arbitrary T_1-space* 1367
Arnol′d, V. I. *Stability of equilibrium position of Hamiltonian system* 247
Generation of almost-periodic motion 501
Some remarks on flows of line elements and frames 562
Aršon, I. S. *A theorem of Phragmén-Lindelöf for a linear elliptic system* 900
Arutyunyan, E. A.; Gyul′misaryan, A. G.; and Ovsepyan, S. G. *Boundary problems for vibrating string* 799
Aržanov, G. V. *Solvability of a type of nonlinear boundary value problem* 895
Asadullin, È. A. *Tests for convergence of multiple series* 86
Azarin, V. S. *Indicator of a function subharmonic in a multidimensional space* 1029
Babič, V. M. *Propagation of Rayleigh waves along homogeneous body* 434
Badalyan, G. V. *Expansion of functions into a quasipower series* 1
Expansion of functions into a quasipower series outside fundamental interval 40
Expansibility of functions and quasianalytic classes of functions 1583
Bakel′man, I. Ya *Generalized Čebyšev's nets and manifolds* 631
Variational problem associated with Monge-Ampere equation 1585
Bakel′man, I. Ya.; and Krasnosel′skiĭ, M. A. *Nontrivial solutions of Dirichlet's problem* 369
Barbašin, E. A.; and Alimov, Yu. I. *Dynamic systems with multiple-valued characteristics* 1111
Barhin, G. S.; and Fomenko, V. T. *Bending of surfaces of positive curvature* 1281
Bašev, V. A. *Representations of the group $Z_2 \times Z_2$* 1589
Bavarin, I. I. *Coefficients of analytic functions of two complex variables* 286
Bazilevič, I. E.; and Korickiĭ, G. V. *Level lines in univalent conformal mappings* 1180
Berezanskiĭ, Yu. M. *A generalization of a multidimensional theorem of Bochner* 143

Berezin, F. A.; and Faddeev, L. D. *A remark on Schrödinger's equation with a singular potential* 372
Berlyand, O. S.; and Pressman, A. J. *Integral error functions of arbitrary order* 1114
Berman, D. L. *Extremum problems in the theory of polynomial operators* 691
Extremum problems in polynomial operators 1223
Bessmertnyh, G. A. *Approximate calculation of bounds of spectrum* 173
Birman, M. Š. *Perturbation of spectrum elliptic operator under variation of boundary* 326
Blagoveščenskiĭ, A. S. *Correct problems for ultra-hyperbolic and wave equations* 1284
Blagoveščenskiĭ, Yu. N. *Diffusion processes with small coefficient and applications* 803
Blagoveščenskiĭ, Yu. N.; and Freĭdlin, M. I. *Diffusion processes depending on parameter* 633
Blank, Ya. P. *On translation surfaces of constant curvature* 1032
Bogaryan, O. K. *Residual of the Bubnov-Galerkin and Ritz methods* 1413
Boltyanskiĭ, V. G. *Modeling of optimal linear high-speed operations by means of relay circuits* 904
Sufficient conditions for optimality 1288
Bondar', V. D. *A representation of a tensor function* 1370
Borisovič, Yu. G. *Weak topology solutions of differential equations* 176
Borozdin, K. V. *A generalization of Abel's theorem* 441
Bovdi, A. A. *Crossed products of a semigroup and a ring* 438
Brodskiĭ, M. S. *Criterion of unicellularness of Volterra operators* 637
Multiplicative representation of analytic operator-functions 695
Brudnyĭ, Yu. A.; and Gopengauz, I. E. *Approximation by piece-wise polynomial functions* 1627
Brušlinskaya, N. N. *Qualitative integration of n differential equations* 845
Bulavskiĭ, V. A. *An iterative method of solution of the problem of linear programming* 250
Burov, V. N. *Approximation of functions by polynomials* 640
Čegis, I. A. *Phragmén-Lindelöf type theorem* 113
Cekanovskiĭ, È. R. *The real and imaginary parts of an unbounded operator* 881
Čèn Se-čan [Chen Se-chan] *Completeness of functions* $\{z^{r_n}\log^j z\}$ *over curves and regions* .. 683
Černavskiĭ, A. V. *Distribution of spheres in n-dimensional sphere* 1244
Černikov, S. N. *Theorems on the separability of convex polyhedral sets* 838
Solution of linear programming problems 1099
Čerskiĭ, Yu. I. *Reduction of periodic problems to singular equations* 1173
Čibisov, D. M. *On the asymptotic power and efficiency of the* ω_n^2 *test* 625
Čibrikova, L. I. *Riemann's problem for automorphic functions* 1401
Čunihin, S. A. *On indexials of finite groups* 70
On extensions of an indexial of a finite group 886
Daleckiĭ, Yu. L. *Continual integrals associated with certain differential equations and systems* 259
Continual integrals and group of operators 1634
Davidenko, D. F. *Error in the network solution of Dirichlet problem* 574
Eigenvalues and eigenvectors of matrices 1423
Delone, B. N. *Fundamental theorem in theory of stereohedra* 812
Demidovič, B. P. *Bounded solutions of a certain quasilinear system* 815
Dezin, A. A. *Various types of invariant systems of simplest structure* 396
Index in boundary-problems for elliptic systems 1484
Doĭčinov, D. *Uniform imbedding into Euclidean space* 817
Dolženko, E. P. *Algebraic hypersurfaces and derivatives of rational functions* 1072

Dragilev, M. M. *Best approximation of functions defined by extendable basis* 953
D'yačenko, V. F. *Cauchy's problem for quasi-linear systems* 7
D'yakonov, E. G. *Variable directions in solving finite difference equations* 577
Iteration method for finite difference equations 647
Dynin, A. S. *Singular operators of arbitrary order on a manifold* 1375
Multidimensional elliptic boundary value problems 1431
Dynkin, E. B. *Eigenfunctions of Laplace-Beltrami operator and Brownian motion* 1433
Dynkin, E. B.; and Malyutov, M. B. *Random walk on groups with a finite number of generators* 399
Dyubyuk, P. E. *On the number of subgroups of a finite abelian group* 298
Džrbašyan, M. M. *Unitary pairs of operators in the space* $L_2(a, b)$ 1427
Completion and closure of incomplete system of functions $\{e^{-\mu_k x} x^{s_k - 1}\}$ 1487
Efimov, N. V. *Hilbert's theorem on surfaces of negative curvature* 189
Efimov, N. V.; and Poznyak, È. G. *Some transformations of the fundamental equations of the theory of surfaces* 225
Hilbert's theorem on surfaces of constant negative curvature 300
Efimov, N. V.; and Stečkin, S. B. *Approximative compactness and Čebyšev sets* 1226
Èĭdel'man, S. D.; and Ivasišen, S. D. *Cauchy problem for a class of nonlinear parabolic systems* 75
Elistratova, M. V. *Finite Hankel integral transforms* 1196
Eremin, I. I. *Groups with finite classes of conjugate subgroups with a given property* 337
Incompatible systems of linear inequalities 821
Faddeev, D. K. *On the divisor class groups of some algebraic curves* 67
Faermark, D. S. *Algorithm for identity of words in nilpotent product of groups* 282
Fil'čakov, P. F. *Determining constants in Schwarz-Christoffel integral* 877
Filippov, A. F. *Solution for quasi-linear parabolic equation* 1517
Fišman, K. M.; and Makovoz, Yu. I. *Neighboring systems in enumerably normed space* 555
Fogels, È. K. *On the distribution of prime ideals* 1322
Freĭman, G. A. *Inverse problems of additive theory of numbers* 1520
Fridman, V. M. *Iteration process for nonlinear operator equation* 1058
Frolík, Z. *Spaces topologically complete in the sense of E. Čech* 323
Locally topologically complete spaces 355
Fuks, D. B. *On duality in homotopy theory* 1575
Fuksman, A. L. *Approximation of functions of several variables* 1623
Gagen-Torn, L. N.; and Mihlin, S. G. *On the solvability of nonlinear Ritz systems* 565
Gahov, F. D.; and Smagina, V. I. *Integral equation of convolution type* 184
Ganea, Tudor *Upper estimates for the Lyusternik-Šnirel'man category* 180
Gauhman, V. A. *Geometry of second order equation with respect to conformal group* 1117
Geodesic surfaces in manifolds with complex structure 1330
Gavrilov, V. *Distortions in quasiconformal mappings* 448
Limits of normal meromorphic functions 504
Gavrilov, V. I. *Angular limiting values of meromorphic functions* 1474
Gavurin, M. K. *The set of solutions of a linear differential equation* 253
Gegelia, T. G. *Properties of n-dimensional singular integrals in the* $L_p(S; \rho)$ *space* 908
Integral equations with integrals over a surface 1530
Geĭdel'man, R. M. *Hypersurface in non-Euclidean spaces* 1035

Geĭsberg, S. P. *Certain properties of summability methods* 256
Gel′fand, I. M.; and Graev, M. I. *Integral transformations in complex affine space* 809
Gel′fand, S. I.; and Každan, D. A. *Integral equation connected with pulse motion* 1476
Gel′man, A. E. *On majorant equations* 912
Gel′man, I. V. *Equivalence of some unbounded operators in Banach space* 329
Genis, A. L. *Endomorphisms of n-dimensional torus* 750
Geronimus, Ya. L. *Inequalities in theory of orthogonal polynomials* 1296
Gil′derman, Yu. I. *Imbedding theorems for abstract functions* 1249
Gimadislamov, M. G. *Expansion in eigenfunctions of a non-selfadjoint system* 1121
Gindikin, S. G. *Integral formulas for Siegel domains* 1480
Ginzburg, Yu. P. *Projection in Hilbert space with a bilinear metric* 980
Girsanov, I. V. *Minimax problems in the theory of diffusion processes* 118
On Itô's stochastic integral equation 506
Gladšev, E. G. *Periodically correlated random sequences* 385
Gluhov, M. M. *Lattice theoretical theorem similar to Gruško's* 753
Gluško, V. P. *An integral inequality and the corresponding imbedding theorem* 450
Glušков, V. M. *Abstract automata and the decomposition of free semigroups* 121
Godunov, S. K. *Nonunique "blurrings" of discontinuities in quasilinear systems* 43
Nonuniqueness for a nonlinear parabolic equation 188
An interesting class of quasilinear systems 947
Gohberg, I. C.; and Kreĭn, M. G. *On the theory of triangular representations of non-selfadjoint operators* 392
Volterra operators with imaginary component in given class 983
Gol′dberg, A. A. *Distribution of values of meromorphic functions* 389
Golovkin, K. K. *Inequalities for smooth functions of n variables* 510
Smoothness of function and convolution operators 949
Golovkin, K. K.; and Solonnikov, V. A. *Nonstationary Navier-Stokes equations* 1188
Gol′štein, E. G. *Infinite-dimensional analogue of linear programming* 1125
Best Čebyšev approximation with conditions on approximating polynomial 1420
Gončar, A. A. *Overconvergence of sequences of rational functions* 1594
Quasianalytic continuation of analytic functions 1631
Gorbunov, A. D.; and Budak, B. M. *Multi-point difference methods for equation* $y' = f(x, y)$ 1192
Gorčakov, Yu. M. *Embedding of locally normal groups* 514
Gorin, E. A. *Partially hypo-elliptic equations and polynomials* 1129
Grigor′eva, I. A. *Extremal functions least deviating from zero* 1039
Grobman, D. M. *Topological and asymptotic equivalence of differential equations* 1251
Gromyko, V. P. *On a criterion for πd-groups to be special* 568
Grušin, V.V. *A property of the solutions of a hypoelliptic equation* 333
Solutions of partial differential equations 852
Gu Lyan′-kun′ *Stephan's problem when time increases unboundedly* 570
Gurevič, B. M. *The entropy of a horocycle flow* 124
Gurevič, G. B. *On certain properties of metabelian Lie algebras* 757
Gurevič, L. A. *A basis in a space of vector functions* 3
Halilov, Z. I. *Stability of solutions of an equation in a Banach space* 362
Hara, I. S. *A numerical method for solving eigenvalue problems* 1523

Hara, I. S. *Hermite's interpolation formula and integral equation* 1579
Harasahal, V. H. *Linear differential equations with quasiperiodic coefficients* 940
Haratišvili, G. L. *Maximum principle in optimal processes involving delay* 28
Havin, V. P.; and Havinson, S. Ya. *Some estimates of analytic capacity* 731
Havinson, S. Ya. *Some problems concerning the completeness of systems* 358
Hovanskiĭ, G. S. *Representation of equation* $f_1+f_2+f_3+f_4+f_5+f_6=0$ *by nomogram with transparency* 735
Huskivadze, G. A. *Conjugate functions and singular Cauchy integrals* 1358
Huzurbazar, M. Š. *On the theory of multiplicative groups of division rings* 241
Hvedelidze, B. V. *Regularization problem in integral equations* 1169
Ibragimov, I. A. *Spectral functions of certain classes of stationary Gaussian processes* 403
Spectrum of a stationary Gaussian process 1441
Ibragimov, I. I.; and Džafarov, A. S. *On some inequalities for an entire function of finite degree and its derivative* 699
Ibragimov, I. I.; and Mamedov, R. G. *Some inequalities for polynomials in a complex variable* 651
Il′in, V. A. *Solvability of the Dirichlet and Neumann problems* 228
Eigenfunctions for a linear self-adjoint elliptic operator 264
Il′in, V. A.; and Šišmarev, I. A. *Smoothness properties of generalized potentials* 1496
Il′in, V. P. *Approximation of functions by continuously differentiable functions* 453
Il′in, V. P.; and Solonnikov, V. A. *Differentiable functions of many variables* 95
Iohvidov, I. S. *Lineals in spaces with Hermite-bilineal metric* 994
Ionescu, D. V. *Representation of divided difference by definite integral.* I 1600
Representation of divided difference by definite integral. II 1638
Ismagilov, R. S. *Semiboundedness and discreteness of spectrum* 1137
Ivanova, N. A. *Asymptotic behavior of Green's function* 1132
Ivlev, E. T. *Submanifolds in paired complexes* 963
Kabanov, N. I. *Variational problem for* $(n-1)$*-dimensional integral* 1141
Kac, G. I. *Generalization of the group principle of duality* 581
Kamenskiĭ, G. A. *Two point problem for nonlinear equation* 966
Kamynin, L. I. *The stability of parabolic difference equations* 192
Boundary problems for parabolic equation 1043
Dependence on boundary for mixed equation 1333
Kamynin, L. I.; and Maslennikova, V. N. *First boundary problem in the large for quasilinear equation* 405
Kanel′, Ya. I. *Some problems involving burning-theory equations* 48
Kapilevič, M. B. *Tricomi's singular problems near singular line* 409
Singular Goursat problems and infinitely distant characteristics 457
Solution of Tricomi problems for Čaplygin's equation 1604
Karacuba, A. A. *Estimates of trigonometric sums of special form* 304
Kartašev, A. P. *Riemannian fiber spaces with holonomy group* 761
Kaširskiĭ, Yu. V. *The distribution of the zeros of Dirichlet's L-series* 584
Kazarinov, N. D. [Kazarinoff, N. D.] *Scalar diffraction by elliptic cylinder or prolate spheroid* 703
Keldyš, Lyudmila *Imbedding into* E^4 *of some monotone images of* E^3 9
Kelendžeridze, D. L. *Theory of an optimal pursuit strategy* 654
Kerimov, M. K. *Discontinuous variational problems with variable end-points* 99

Kerimov, M. K. *Second variation for discontinuous problems* 1145
Kesel'man, G. M. *Notion of basis and Bari's theorems on bases* 1445
Kibenko, A. V. *Ordinary differential equations in Banach spaces* 151
Kim, E. I.; and Ivanova, L. P. *Solvability of boundary problem of parabolic system* 998
Kirillov, A. A. *On a problem of I. M. Gel'fand* 268
Unitary representations of nilpotent Lie groups 588
Kivistik, L. A. *A modification of the minimum-residual iteration method for the solution of equations involving nonlinear operators* 13
Klokov, Yu. A. *Boundary value problem with conditions at* $\pm\infty$ 1002
Kogalovskiĭ, S. R. *Structural characterizations of axiomatic classes* 196
On multiplicative semigroups of rings 1299
Koh, Hel'mut [Helmut Koch] *The Galois group of a local field* 461
Kondrat'ev, V. A. *First boundary value problem for elliptic equations* 127
Konoplev, V. P. *Orthogonal polynomials with weight functions* 1538
Kopaček, I. *Cauchy problem for hyperbolic equations* 1500
Korneĭčuk, N. P. *Best uniform approximation of continuous functions* 1254
Best uniform approximation of differentiable functions 1449
Korobeĭnik, Yu. F. *Analytic solutions of partial differential equations* 1337
Korotkov, V. B. *On Sobolev's imbedding theorems for abstract functions* 1453
Koval'čik, I. M. *Representation of solution to Cauchy's problem by a Wiener integral* 824
Krasnosel'skiĭ, M. A.; and Rutickiĭ, Ya. B. *Approximate methods for nonlinear operator equations based on linearization* 1542
Kreĭn, S. G.; and Petunin, Yu. I. *A criterion for relationship of two Banach spaces* 1080
Kreĭn, S.G.; and Semenov, E. M. *On a space scale* 706
Krotov, V. F. *Principal problem of calculus of variations* 231
Absolute minimum of functionals 1228
Krupickiĭ, È. I. *Class of polynomials deviating least from zero* 657
Kružkov, S. N. *A priori estimation for quasilinear parabolic equations* 764
Krylov, V. Yu. *On a limit theorem* 855
Kublanovskaya, V. N. *Algorithms for the complete problem of eigenvalues* 17
Kukles, I. S.; and Suyaršaev, A. M. *Generalized Frommer's method* 20
Kupcov, N. P. *Non-selfadjointness of second-order linear differential operator* 710
Kuroš, A. G. *Radicals in the theory of groups* 1546
Kuz'minov, V. *On* V^n *continua* 858
An example of a dimensionally deficient compactum 1457
Ladyženskaya, O. A.; and Ural'ceva, N. N. *Solutions of elliptic equations and variation problems* 516
Boundary problem for parabolic equations 969
Generalized solutions of quasilinear elliptic equations 1149
Lavrik, A. F. *Number of k-twin primes lying on an interval* 52
Distribution of sets of primes with given differences 827
Additive problem with squares of primes 1232
Lebedev, V. I. *Dirichlet's and Neumann's problems on lattices* 519
Lebedev, N. N.; and Pergamenceva, È. D. *Integral equations for Whittaker's equations* 1341
Lemleĭn, V. G. *Spaces with centro-projective connection* 830

Levin, A. Yu. *Green's function in a many point problem* 154
On some estimates of a differential function 523
On the stability of solutions of equations of second order 1642
Levin, Yu. I. *Some spaces with affine connection admitting motions* 464
Levšenko, B. *On infinite dimensional spaces* 915
Linnik, Yu. V. *Dispersion method in binary additive problems* 468
Lipiński, Jan *Convergence to infinity of continuous functions* 1258
Litvinčuk, G. S. *A problem generalizing Carleman's boundary value problem* 918
Litvinčuk, G. S.; and Hasabov, È. G. *Singular integral equations subject to Fredholm's alternative* 1152
Lizorkin, P. I. *Green's E-function of Beltrami's operator* 1047
Losik, M. V. *Klein spaces as Kawaguchi spaces* 1084
Lyubarskiĭ, G. Ya. *Construction of transitional solutions to nonlinear equations* 1344
Lyubčenko, I. S. *Newton's method for non-linear differential equation* 525
Macaev, V. I. *On a class of completely continuous operators* 972
Volterra operators produced by perturbation of self-adjoint operators 1013
Majerczyk, Joanna *Separatrices of plane dynamical systems* 1301
Maksimov, Yu. D. *Extension of convex univalent functions* 56
Mal'cev, A. I. *Undecidability of the elementary theory of finite groups* 714
On the elementary theories of locally free universal algebras 768
Effective inseparability of true from refutable formulas 1005
Mamedov, R. G. *Approximation of functions by Landau operators* 861
Manin, Yu. I. *Diophantine equations over function fields* 1009
Manturov, O. V. *Riemannian spaces with irreducible group of rotations* 1550
Riemannian spaces with orthogonal and symplectic groups of motions 1608
Marčenko, N. V. *Solutions of nonlinear integral equations* 305
Maz'ya, V. G. *Some estimates for solutions of elliptic second-order equations* 413
p-conductance and imbedding into space C. 1200
Meĭman, N. *Zeros and extremal properties of entire functions* 1261
Completeness of the zeros of entire functions 1555
Melamed, V. B. *Analytic solutions to some nonlinear integral equations* 1264
Mel'nik, I. M. *On Hilbert's boundary value problem* 661
Mel'nikov, V. *Region of capture for system approximating a Hamiltonian* 865
Mergelyan, S. N. *Certain classes of sets and their applications* 590
Meščeryakov, G. A. *New extremal problems* 158
Mihaĭlov, L. G. *A boundary value problem of linear conjugation* 922
Elliptic equations with singular coefficients 976
Mihaĭlov, V. *Dirichlet problem and first mixed problem* 1204
Mihal'čuk, V. G. *Rational functions on Riemannian faces* 598
Mihlin, S. G. *Singular integral equations in the classes of Lipschitz functions* 665
Mityagin, B. S. *Riesz nuclear scales* 309
Indefinitely differentiable function with given derivatives 594
Moĭšezon, B. G. *Projective imbeddings of algebraic varieties* 1504
Molčanov, A. M. *Motions and asymptotic methods in nonlinear oscillations* 162
Stability of a neutral linear approximation 1378

Monohov, V. N. *Inverse mixed boundary value problem for several unknown arcs* 1558
Mysovskih, I. P. *Error in numerical solution of integral equation* 1268
Nagaev, S. V. *Homogeneous Markov process with discrete time* 867
Nagornyĭ, N. M. *Realization of functions in alphabets* 1156
Naĭmark, M. A. *Isomorphic representations of rings and groups* 270
Nazarova, L. A. *Integral representations of Klein's four-group* 1304
Nečiporuk, È. I. *Complexity of schemes in certain bases* 1087
Nižnik, L. P. *The problem of inelastic scattering* 1237
Novikov, S. P. *On imbedding simply-connected manifolds in euclidean space* 718
Novruzov, A. A. *Properties of solutions of elliptic equations* 1089
Oleĭnik, O. A. *The convergence of certain divided-difference schemes* 313
Quasi-linear parabolic equations with many variables 529
Olevskiĭ, A. M. *Divergent series in L^2 with respect to complete systems* 669
Divergent Fourier series for continuous functions 1382
Oniščik, A. L. *On the classification of fiber spaces* 1561
Ostianu, N. M. *Geometry of an n-dimensional surface* 131
Ovsepyan, S. G. *Homogeneous boundary value problems for differential operators* 926
Palamodov, V. P. *General form of solution of a homogeneous differential equation* 339
Partially hypoelliptic operators 1308
Polynomial ideals and factor spaces 1647
Palant, Yu. A. *Eigenvectors and adjoint vectors of polynomial bundle of operators* 1507
Paneyah, B. P. *On certain theorems of Paley-Wiener type* 533
General systems of differential equations 602
Parovičenko, I. I. *On the weight and power of H-closed spaces* 835
Pašenkov, V. V. *The lattice of subspaces of Hilbert space* 775
Pasynkov, B. *On reversed spectra and dimensionality* 772
Pavlov, B. S. *The non-selfadjoint operator $-y'' + q(x)y$ on a half-line* 1565
Pavlova, E. A. *Densities of hyperimmune sets* 1017
Pergamemščikov, M. B. *On a configuration of H congruences* 778
Petrov, P. I. *Non-Riemannian geometry in a two-dimensional domain* 1271
Petrov, V. V. *Integral theorems for large deviations* 721
Petunin, Yu. I. *Criterion for reflexivity of a Banach space* 1160
Pliss, V. A. *On the existence of periodic solutions of certain nonlinear systems* 416
The phenomenon of convergence in nonlinear periodic systems 606
Nonlinear differential equations of third order 930
Plotkin, B. I. *Some properties of automorphisms of nilpotent groups* 471
Radicals in group pairs 1312
Pogorelov, A. V. *Regularity of convex surfaces in Lobachevsky space* 235
Isometric immersion in the large of a two-dimensional Riemannian manifold 274
Isometric transformations of punctured convex surfaces 475
Rigidity of closed surfaces nonhomeomorphic to a sphere 537
Isometric immersion of a two-dimensional Riemannian manifold 1020
Regularity of convex surface with regular metric 1051
Pohožaev, S. I. *Analogue of Schmidt's method for nonlinear equations* 103

Pohožaev, S. I. *On the boundary value problem for the equation* $\Delta U = U^2$ 609
Polovickiĭ, Ya. D. *Groups with condition of* Π*-minimality* 780
Poluyanova, M. F. *The summability of the product of two numerical series* 1651
Polyakova, V. M. *Level lines of the solution to an elliptic equation* 1348
